PROFILE

An IT enthusiast, and a self-taught Frontend Developer. Strong assets include **HTML5, CSS3, SASS, JavaScript**, quick learning, **strong information technology**, cloud computing, **critical problem-solving** skills, and the ability to see projects through from inception to completion. With an eagerness to learn and an undeniable passion. Open for opportunities in Los Angeles, New York or Remote.

EMPLOYMENT HISTORY

Frontend Developer, Freelance — Los Angeles
Jul 2020 — Present

- Translated static designs into mobile-first interactive websites using HTML5, CSS3/SASS (layouts combining **CSS Grid & flexbox**) and modern **ES6 JavaScript**.
- Developed web pages based on design specifications and integrate new features into existing web applications.
- Developed home pages & landing pages ensuring that images and code are optimized, cross-browser and platform compatible, and **SEO-friendly**.
- Evaluate code to ensure it meets industry standards, is valid, is properly structured, and is compatible with browsers, devices, or operating systems.
- Developed the following projects from scratch by using HTML5, CSS/SASS & JavaScript. All projects were developed by keeping **coding standards**, accessibility, image optimization, font loading strategies in mind for better performance. Used **GitHub** for version controlling and uploading all the projects.
  - Designo Agency
  - Responsive Landing Page
  - Testimonial Grid Layout
  - Dice Game
  - Budgeting App
  - Guess My Number App

WORK AUTHORIZATION

Authorized to work in the US for any employer.

IT & Business Operations, Lerner Solutions | YOCA | NB Collaborative

New York City

Jul 2007 — Jun 2020

- Utilized AWS, such as Route53, CloudFront, VPC, ELB, EC2, SG, IAM, RDS, DynamoDB, S3, and Auto Scaling, to design and develop highly-available and fault-tolerant three-tier architecture with a focus on well-architected framework.
- Provided dynamic and comprehensive leadership to a large-scale O365 implementation aimed at improving **project communication** for a key client, including facilitating communications and change management.
- **Increased revenue by 55%** by coordinating and managing retail-based technology interventions, including ERP, dashboards, production trackers, and more.
- Leveraged knowledge of **Agile and Waterfall methodologies** to effectively define project processes and tools and develop project roadmaps, plans, schedules, and **work breakdown structures**, ensuring compliance with client goals.
- Drove technological transformation across design and delivery processes by leading architects, engineers, and technology professionals in developing out-of-the-box solutions.
- Maintained responsibility for network infrastructure, servers, network applications, storage, routers, virtual environment, switches, intrusion prevention/detections, network services, patch management, and virus prevention.
